

DreamBig

Prepared by Wei Min Voon

Documentation for the homepage design

- The homepage comes after the wizard component.
- The homepage design is based on the concept of star system.
- Each star/planet represent a category.
- A set of stars/planets represent a trimester.
- When the star/planet is click, the information about the task will pop-up.
- There are two views for the homepage:
 1. Zoom-in view to view a specific trimester.
 2. Zoom-out view can view the entire progress from the start.
- A Figma prototype has been created (Reference 1).
- 2 styles of design were created:
 1. Style 1: Stars represent a category. Stars with 2 colours represents multi-category.
 2. Style 2: Different planets represent different category.

Changes to made/things to do in Trimester 3:

- The design of homepage needs to be changes with similar style shown in reference 2. Brainstorm a design that fulfil this requirement.
- Think of a style to represent multi-category instead of using multi-colour stars. (Different combination of categories will need different style to represent it).
